Premium BAREFOOT shoes

The style and workmanship of the materials is very elegant and suitable especially for the city to wear all day.

This is a 100% Portuguese handmade product, including premium leather, insole and sole.

The sole with protective edges around the entire circumference is 4.5 mm high from the most flexible and light heat-treated rubber.

The handmade production of Strobel footwear guarantees real comfort and long durability of all materials. The shoes have a minimum of sewing, which increases the feeling of comfort.

The sole is very flexible and non-slip with high adhesion to the surface.

The leather comes from the best Portuguese tanneries. The best properties of this leather are suppleness, softness, absorption and natural drawing and color.

From an ecological point of view, leather is a by-product of animal production and it is a sustainable production in relation to the environment.

All our leathers meet the REACH certification according to the EU classification.
